

FARMER

Mold & Machine Works Inc.

Automatic 12-Mold Parts Caster

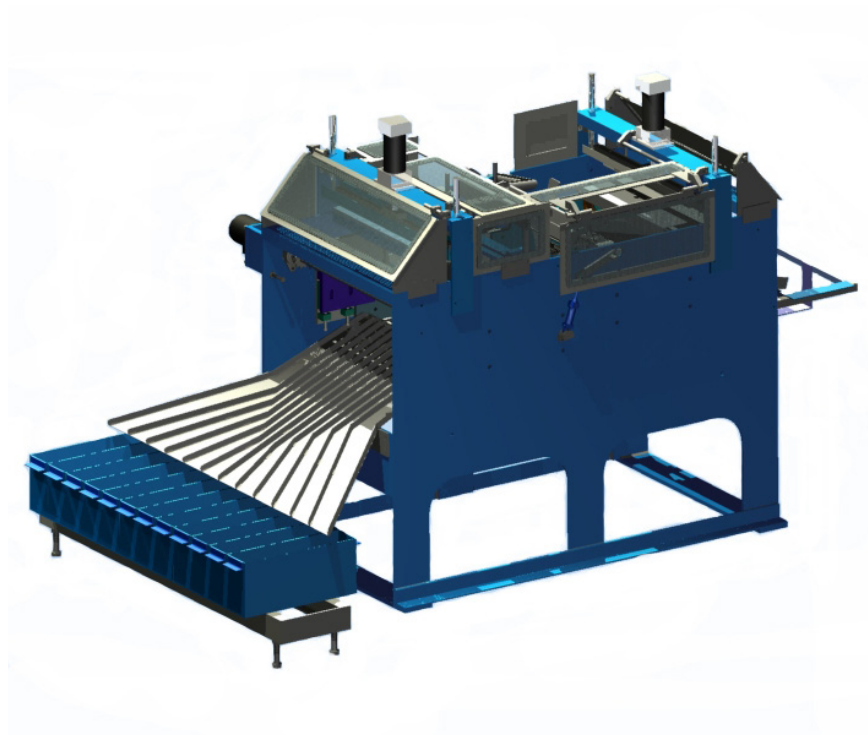

The Automatic 12-Mold model 1800 parts caster (originally made by Winkle Machine Company) is a workhorse. With many improvements to the control and drive units but retaining the lessons learned by millions, if not billions of parts that have been made on this machine the world around, the Farmer 1800 Parts Caster is a solid investment.

The Model 1800 parts caster is one of the industries leading workhorses in the area of parts casting.

With its flexibility to cast parts from one to up to 12 individual molds, this machine offers flexibility in meeting small parts production requirements.

Parts are cast in molds and are then sorted into individual collection bins.

Up to two parts casters can be operated from one lead source with one attendant.

Features

- Production of up to 12,000 parts per shift (using 12 individual molds)
- Crafts posts and connectors in any combination
- 1 to 12 molds poured simultaneously
- Rapid Changeover
- Small Foot Print

Benefits

- Competitive mold design and manufacturing
- Low Maintenance Costs
- Can be utilized for industrial and automotive batteries
- Minimal Down Time
- Special electronics and/or modifications available
